

ATAG

SERVING INDUSTRY SINCE 1947

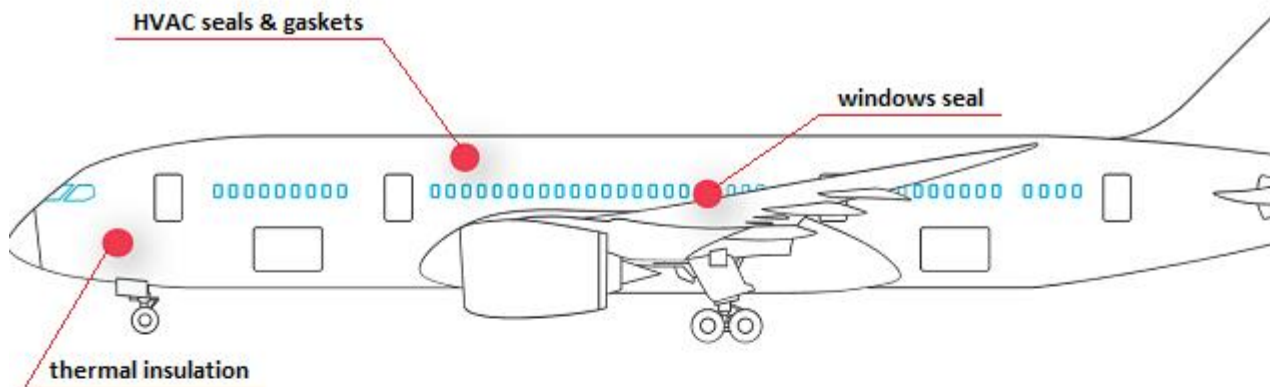

SILICONE RUBBER FOR AEROSPACE APPLICATIONS

In an industry with no margin for error, it is crucial to know that ATAG draws on the expertise of selected partners who have materials and technology serving the automotive and aerospace industry with silicone solutions that are second to none.

ATAG, together with its Partners, has built a vast knowledge and expertise in aviation-specific silicone rubber applications.

With the outstanding ability to endure incredible stresses and temperature extremes, silicone rubber is widely used throughout the aerospace and aviation industries.
